

Personal Space Quartz Heater

This compact quartz heater is designed for personal space heating. It features a safety grill, adjustable thermostat and lightweight, portable design.

Overview

Compact Heating Solution

This personal space quartz heater is designed for rapid and efficient warmth in compact environments. Featuring a quartz tube heating element, it offers dual heat settings to suit various comfort needs. With built-in safety mechanisms like overheat protection, it is an ideal portable choice for home offices, dorms, or personal workspaces.
