

Personal Watercraft (PWC) - Sheet Moulding Compound

This personal watercraft is constructed using a sheet moulding compound forming technique. It is lightweight and designed for long life.

Product Overview

High-Performance Personal Watercraft

This personal watercraft features a robust hull design engineered for superior stability and maneuverability in various water conditions. With a powerful 1100cc 4-stroke engine, it offers quick acceleration and an exhilarating ride for up to three passengers. Designed for versatility, this craft is perfect for recreational use across lakes, rivers, and coastal environments.
