Product Overview

High-Efficiency PET Blow Molding Solution

This semi-automatic PET bottle blowing machine is engineered for high cost-performance, integrating essential components like the compressor, pre-heating, and blowing units into a single system. Designed for versatility, it is suitable for manufacturing bottles under 2 liters with a consistent output of 800 to 900 pieces per hour. It offers a reliable solution for production environments requiring flexibility and precision control over bottle parameters.

Performance Metrics

Production Capacity

900 pcs/hr

Max Output

Technical Specifications

Automation Level

Semi-automatic

Maximum Bottle Size

2 L

Model Number

HZ-880

Features

Included Systems

- Air Compressor
- Pre-heating System
- Blowing System
- Conveyor System

Operational Capabilities

Temperature Control, Pressure Adjustment, Cycle Time Control, Safety Protection
