

PET Bottle Crushing and Washing Line

This system efficiently processes and recycles PET bottles. It reduces PET bottles into smaller flakes, removing contaminants for subsequent processing.

Product Overview

PET Bottle Recycling Solution

This used PET bottle crushing and washing line is a comprehensive system engineered for efficient material handling and cleaning in recycling facilities. The integrated equipment includes a feeding mechanism, a high-capacity crushing unit, multiple washing stages, and a conveying system. It is designed to effectively reduce PET bottles into clean, uniform flakes, removing contaminants to prepare the material for subsequent processing.

Technical Configuration

Included Components

- Feeding Mechanism
- Crushing Unit
- Washing Stages
- Conveying System

Equipment Status

Used

Application

Processed Material	PET Bottles
Output Form	PET Flakes
