

PET Bottle Mould

Precision-engineered mould designed for manufacturing plastic bottles. This multi-cavity mould enables efficient production of PET bottles with detailed surface features.

Product Overview

Precision PET Bottle Moulding Solution

This precision-engineered mould is specifically designed for the high-volume manufacturing of PET bottles. Constructed from high-grade tool steel, it ensures exceptional durability and longevity for consistent, high-quality output. The design incorporates optimized cooling channels to facilitate rapid cycle times, making it an ideal choice for efficient, large-scale production environments.

Technical Specifications

Key Design Features

- Optimized cooling channels for rapid cycle times
- Precise alignment mechanisms
- Detailed surface feature capability

Material Construction	High-grade tool steel
Production Type	High-volume, Multi-cavity
