

PET Bottle Rotary Blowing Machine

This rotary blowing machine is designed for efficient PET bottle production. It utilizes a multi-cavity mold system and automated preform feeding to ensure stable performance and consistent bottle quality.

Overview

High-Speed Rotary PET Blowing Solution

This high-speed rotary bottle blowing machine is engineered for the efficient, large-scale production of PET bottles. It features an advanced multi-cavity mold system and automated preform feeding to ensure consistent, high-output manufacturing. Designed for stability and low energy consumption, the system offers precise temperature control and an intuitive interface, making it a reliable choice for professional production lines.

Technical Capabilities

Key Features

- Multi-cavity mold system
- Automated preform feeding
- Precise temperature control
- User-friendly parameter adjustment interface

Operational Advantages

High-speed output, Stable performance, Low energy consumption, Minimal maintenance
