

# Pet Food Extrusion Machine

The pet food extrusion machine is designed to improve the market for pet food. This machine endows pet food with novel shapes, unique tastes, and colors.

## ADDITIONAL IMAGES

## Product Overview

A comprehensive view of the modern pet food extrusion line, designed for high-efficiency production.

### Advanced Pet Food Extrusion System

This newly-designed extrusion line is engineered to enhance pet food production, leveraging years of research in food machinery. The system enables the creation of pet food with novel shapes, unique textures, and appetizing colors, while supporting scientific nutrition formulations for easy assimilation. It offers advanced capabilities, including the production of cored-filling pet food, to meet the evolving demands of the modern pet food market.

## Production Capabilities

### Available Capacities

- 150kg/h
- 240kg/h
- 500kg/h
- 1 ton/h
- 2 ton/h

### Production Flow

Mixing system ' Extrusion system ' Drying system ' Flavoring system ' Packing system

## Technical Details

### Compatible Raw Materials

Soya flour, Bone powder, Corn flour, Fish meal

### Product Shaping

Variety of shapes available by adjusting the extruder mould
