Product Overview

Versatile Pet Play Tunnel

This flexible pet play tunnel is designed for durability and ease of use in outdoor settings. Constructed from high-quality PVC fabric with a reinforced steel wire frame, it offers excellent resistance to temperature extremes, water, and tears. The lightweight, collapsible design ensures simple installation and convenient storage, making it an ideal choice for active pet play and training.

Technical Specifications

Temperature Tolerance

-20 °C

Minimum Temperature

80 °C

Maximum Temperature

Available Lengths

- 5m
- 10m
- Customizable

Material

PVC Fabric, Helix Steel Wire, Rubber Strip

Features & Benefits

Key Performance Features

Water Resistant • Tear Resistant • Oleic Acid Resistant • Lightweight • Collapsible

Design Highlights

The tunnel features a robust steel collar at both ends for stability and secure placement. The rubber strip includes punching for hanging rings, allowing for flexible setup configurations. Its lightweight construction allows it to be rolled up quickly, facilitating easy transportation and space-saving storage when not in use.
