

Petrochemical Engineering Services

These services encompass design, procurement, and construction for petrochemical projects. They provide comprehensive engineering support, ensuring quality and efficiency.

Service Overview

Comprehensive Engineering Solutions

This service provides end-to-end support for petrochemical, coal chemical, and oil refining projects. Leveraging extensive industry expertise, it covers the entire project lifecycle from feasibility studies and engineering consulting to design, procurement, and construction management. The service is designed to integrate resources efficiently, ensuring excellent project delivery through a deep understanding of complex client requirements.

Service Scope

Project Lifecycle Stages

- Feasibility Studies
- Engineering Consulting
- Design
- Procurement
- Construction Management
- General Contracting
- Project Management
- Training Services

Target Industries

Petrochemical, Coal Chemical, Oil Refining

Operational Capabilities

Project Management Approach

Resource Integration • Comprehensive Systems • Expert-Led Teams • Full-Process Delivery
