

# Petrol Dispensing Pump

This is a petrol dispensing pump. It is designed for efficient fuel transfer.

## Overview

### Industrial Petrol Dispensing Solution

This petrol dispensing pump is engineered for robust industrial applications, providing reliable fuel transfer capabilities. Designed as a self-contained hydraulic power unit, it integrates a high-performance electric motor, pump, and precise control valves. The system is mounted on a stable base to ensure ease of installation and operational durability in demanding environments.

## Technical Specifications

### Integrated Components

- Reservoir
- Electric Motor
- Hydraulic Pump
- Control Valves
- Mounting Base

### Design Features

Self-contained System • High Force Capability • Stable Base Mounting

### Application Suitability

Industrial, Fuel Transfer, Hydraulic Power
