

Petrol Powered Water Pump

This high-performance petrol-powered water pump is designed for efficient drainage and irrigation. It features durable construction and a high flow rate for demanding agricultural and industrial applications.

Overview

High-Performance Petrol Water Pump

The GP80 petrol-powered water pump is engineered for high-efficiency drainage and irrigation tasks. Its durable construction and powerful engine ensure reliable performance in demanding agricultural and industrial environments. This portable solution is ideal for transferring water from sources such as ponds and streams.

Key Features

Applications	Agricultural Irrigation, Industrial Drainage, Water Transfer
