

Petrol Welding Generator

This petrol-powered welding generator is designed for both welding and power generation. It features AC and DC welding capabilities and AC power outlets for running auxiliary equipment.

Overview

Versatile Welding and Power Solution

This petrol-powered welding generator is engineered for professional versatility, serving as both a reliable arc welder and a portable power supply. Designed for on-site maintenance and emergency use, it features a robust build with integrated portability options. With dual-functionality, it provides essential AC power for auxiliary equipment while delivering consistent welding performance.

Power Performance

Emergency Nominal Power	4.5 kVA
Continuous Nominal Power	4 kVA
Power Factor	1

Electrical Specifications

Supported Voltages	120V, 220V, 230V, 240V
Alternator Connection	Single phase

Engine Details

Engine Model	188F-13HP
Engine Stroke	4
