

Petroleum Processing Tank

This industrial-grade petroleum processing tank is designed for use in oil refineries and petrochemical plants. The tank is constructed from heavy-duty steel and is equipped with multiple flanged nozzles for fluid transfer and connection to other processing components.

Product Overview

Industrial Petroleum Processing Tank

This industrial-grade petroleum processing tank is engineered for high-performance fluid handling in demanding environments like oil refineries and petrochemical plants. Featuring a robust cylindrical design with conical ends, the unit is constructed from heavy-duty steel to ensure durability and operational safety. Mounted on a wheeled chassis, it offers enhanced mobility for flexible integration into existing processing workflows.

Technical Specifications

Suitable Environments

- Oil Refineries
- Petrochemical Plants

Mobility

Mobile • Wheeled Chassis

Material

Heavy-duty steel

Design Features

Cylindrical Tank, Conical Ends, Wheeled Chassis, Flanged Nozzles
