

# Petroleum Prospecting Geophysical Exploration Service

This geophysical exploration service is used for petroleum prospecting engineering. It provides detailed geological surveys and analysis to identify potential oil and gas reserves.

## ADDITIONAL IMAGES

## Service Overview

### Comprehensive Geophysical Exploration

This professional geophysical exploration service provides end-to-end solutions for onshore seismic data acquisition, processing, and interpretation. Designed for the petrochemical sector, the service utilizes advanced seismic technology to map subsurface geological structures and identify potential oil and gas reserves. With extensive operational experience across diverse international regions, the service ensures high-precision data for informed decision-making in exploration projects.

## Operational Capabilities

### Active Seismic Crews

5 crews

### Core Service Offerings

Seismic Data Acquisition, Seismic Data Processing, Seismic Data Interpretation

## Global Reach

### Operational Experience

- China
- Myanmar
- North Korea
- Thailand
- Bolivia
- Yemen
- Papua New Guinea
- Kyrgyzstan

## Technical Infrastructure

### Deployed Equipment

- Seismic Vibrator Trucks
- Mobile Drilling Rigs
