

PEX Tee Fitting - Plastic, Barbed

This plastic PEX tee fitting is designed for joining three PEX pipes. It features barbed ends for secure connections with PEX tubing and is suitable for potable water distribution and hydronic heating systems.

Product Overview

High-Performance PEX Tee Fitting

This durable plastic PEX tee fitting is engineered for reliable pipe connections in plumbing and heating systems. Featuring a barbed design, it ensures a secure grip on PEX tubing, making it ideal for both potable water distribution and hydronic heating applications. Its plastic construction provides excellent corrosion resistance, ensuring long-term performance and reliability in professional plumbing installations.

Technical Specifications

Material	Plastic
Fitting Type	Tee
Connection Type	Barbed

Applications

Primary Applications	Potable Water, Hydronic Heating
----------------------	---------------------------------

Key Features

Performance Benefits

- Corrosion resistant
- Secure barbed connection
- Durable construction
