

Pharmaceutical Powder Mixing Machine

This polydirectional movable mixing machine is designed for pharmaceutical and medical applications. It features stainless steel construction, a rotating mixing chamber with a conical bottom, and a control panel for adjusting mixing speed and duration.

Overview

High-Efficiency Pharmaceutical Mixing

This polydirectional movable mixing machine is engineered specifically for the rigorous demands of pharmaceutical and medical manufacturing environments. Featuring a robust stainless steel construction, it ensures optimal hygiene standards and long-term durability. The system utilizes a specialized rotating mixing chamber with a conical bottom, designed to deliver efficient and uniform blending of powders and granules.

Technical Specifications

Construction Material	Stainless Steel
Mixing Mechanism	Polydirectional rotating chamber with conical bottom

Control & Operation

Control Interface	Precision control panel for speed and duration
Remote Control Range	10 m

Features

Key Features	Stainless Steel Construction, Polydirectional Mixing, Conical Bottom Chamber, Remote Operation
--------------	--
