

Pharmaceutical Processing Machine

This machine is designed for pharmaceutical processing applications. It features a robust build, analog gauges for performance monitoring, and a control panel for operational adjustments.

Overview

Industrial Pharmaceutical Processing Solution

This heavy-duty industrial machine is engineered specifically for demanding pharmaceutical manufacturing environments. It features a robust build designed for continuous operation, integrating essential analog gauges for real-time performance monitoring and a dedicated control panel for precise operational adjustments. This equipment is built to meet the rigorous standards required for pharmaceutical processing applications.

Technical Specifications

Build Quality

Heavy-duty • Industrial Grade

Model Designation

LG-80

Power Source Type

Automatic Argon Arc Welding DC Pulse Power Supply

Control & Monitoring

Monitoring Interface

- Analog performance gauges
- Operational control panel

Ventilation System

Yes
