

# Pharmaceutical Production Equipment

This equipment is designed for pharmaceutical production. It facilitates the manufacturing of medications, tablets, and other pharmaceutical products.

## Product Overview

### Pharmaceutical Production Equipment

This high-performance pharmaceutical production equipment is engineered to meet the rigorous demands of modern manufacturing environments. Designed with precision and efficiency in mind, it supports consistent output quality and reliable operational performance. Built to facilitate scalability, this machinery is an essential asset for facilities aiming to optimize their production workflows and maintain strict industry standards.

## Compliance & Standards

### Certifications

ISO 9001, GMP Compliant, CE Certified

## Technical Specifications

### Key Performance Metrics

**98.5 %**

Efficiency Rate

**500 units/min**

Output Capacity

### Construction Material

Medical-grade 316L Stainless Steel
