

Pharmaceutical Production Equipment

This equipment is used in the production of various pharmaceutical products. It ensures precision and efficiency in pharmaceutical manufacturing processes.

Product Overview

Professional Pharmaceutical Manufacturing Solution

This pharmaceutical production equipment is engineered to meet the rigorous demands of modern laboratory and manufacturing environments. Designed for efficiency and precision, it supports high-volume processing while maintaining strict quality control standards. The robust construction ensures durability and consistent performance for critical production workflows.

Compliance & Standards

Certifications

ISO 9001, GMP Compliant, CE Certified

Technical Specifications

Key Performance Metrics

220 V

Operating Voltage

50 Hz

Frequency

Construction Materials

- Stainless Steel 316L
- Food-grade Silicone Seals
- Reinforced Polymer Components
