

Pharmaceutical Production Machinery

This equipment is used in the production of pharmaceutical products. It ensures the accurate and efficient manufacturing of medications and other healthcare products.

Product Overview

Industrial Fastening Solution

This blind rivet, also known as a pop rivet, is a specialized fastener engineered to join multiple materials securely. Designed for applications where access to the back of the joint is limited, the rivet utilizes a setting mandrel to create a permanent and robust connection. It is an essential component for assembly processes requiring reliable, blind-side installation.

Technical Details

Fastener Type	Blind Rivet (Pop Rivet)
Installation Mechanism	Mandrel-driven expansion
Key Features	Blind-side installation, Permanent joint, Mandrel break-off, Secure clamping
