

Pharmaceutical Refrigerator with Freezer

This refrigerator is designed for pharmaceutical and medical storage. It features a two-door upper section and a bottom freezer drawer.

Product Overview

Professional Pharmaceutical Storage

This high-performance pharmaceutical refrigerator with a dedicated bottom freezer drawer is engineered for the precise storage requirements of medical and laboratory environments. Featuring a robust stainless steel construction and ergonomic French door design, it ensures optimal temperature control and accessibility for sensitive contents. The unit combines modern aesthetics with the reliability needed for critical pharmaceutical applications.
