

Pharmaceutical Stainless Steel Storage Tank

This horizontal tank is constructed from high-grade stainless steel. It is designed for the storage, mixing, and processing of pharmaceutical liquids and solutions.

Product Overview

Pharmaceutical-Grade Storage Solution

This horizontal stainless steel storage tank is specifically engineered for pharmaceutical applications, offering a robust solution for storage, mixing, and processing of liquids and solutions. Designed with a cylindrical body and elliptical heads, the unit ensures optimal flow and hygiene. Constructed from high-grade stainless steel, it provides excellent corrosion resistance and meets stringent sanitary standards required for pharmaceutical manufacturing.

Design & Construction

Material	High-grade stainless steel
Tank Configuration	Horizontal cylindrical body with elliptical heads
Support	Sturdy stainless steel legs
Compliance & Standards	Sanitary Standard Compliant, Corrosion Resistant

Technical Specifications

Connections

- Top-mounted process ports
- Top-mounted access fittings

Application Suitability

Storage • Mixing • Processing
