

Phillips Head Screwdriver with Ergonomic Handle

This hand tool is designed for tightening and loosening screws with a Phillips head recess. It features a steel shank for durability and a molded handle for comfortable grip and torque application.

Product Overview

Professional Phillips Head Screwdriver

This Phillips head screwdriver is a professional-grade hand tool engineered for reliability in assembly, repair, and maintenance tasks. It features a robust steel shank for long-lasting durability and a precision-tip design to ensure a secure fit with screw recesses. The ergonomic molded handle is specifically designed to provide superior grip and torque application, reducing hand fatigue during extended professional use.
