

Photoelectric Smoke Detector with Alarm

This photoelectric smoke detector quickly detects smoke to provide early fire warnings. It features a test button, low battery indicator, and loud alarm for reliable safety.

Overview

Reliable Fire Detection

This photoelectric smoke detector is engineered for rapid and accurate smoke detection, providing critical early warnings to help ensure safety in both residential and commercial environments. The device is built for reliability and ease of use, featuring intuitive maintenance checks and a loud alert system. Designed for straightforward installation, it offers an essential layer of protection for any property.

Technical Features

Key Features

- Test button for functional verification
- Low battery indicator
- High-decibel alarm output

Detection Technology	Photoelectric
Model Identifier	HS-102

Installation & Maintenance

Maintenance	Easy Installation, Low Battery Warning
