

Physical Measurement Meter

This meter is used for taking physical measurements. It is a precise instrument utilized in various fields for accurate dimensional analysis.

Overview

Precision Measurement Solution

This physical measurement meter is designed for accurate data acquisition in demanding environments. Engineered for reliability, it provides consistent performance for professional applications requiring precise physical metrics. Its robust construction ensures durability, making it an essential tool for technical operations.

Technical Specifications

Model Identifier	XT150-18
Device Category	Physical Measurement Meter

Features

Key Capabilities

- High-precision sensing
- Durable industrial-grade casing
- Compact form factor
- Optimized for professional use

Compliance

Certifications	ISO 9001, CE Certified
----------------	------------------------
