Product Overview

Versatile Digging and Prying Tool

The pick mattock head is a professional-grade tool engineered for heavy-duty digging and prying tasks. Constructed from hardened steel, it features a dual-ended design: a pointed pick for breaking through hard soil, rocks, and roots, and a chisel-shaped blade for efficient chopping and grubbing. This tool is an essential asset for landscaping, construction, gardening, and archaeological excavation projects.

Technical Specifications

Key Design Features

- Pointed pick end for breaking hard surfaces
- Chisel-shaped mattock blade for chopping
- Central eye for wooden handle attachment

Material

Hardened Steel

Applications

Primary Applications

Gardening, Landscaping, Construction, Archaeology
