

PICMG1.0 LGA775 CPU Card with Dual GbE

The PICMG1.0 CPU card supports LGA775 Intel Core™ 2 Duo processors, balancing performance and power efficiency. Integrated VGA output and dual Gigabit Ethernet ports enable display connectivity and high-speed networking.

Overview

Industrial Computing Power

This PICMG1.0 CPU card is engineered for demanding industrial environments, featuring support for LGA775 Intel Core™ 2 Duo processors. It balances robust performance with power efficiency, making it an ideal choice for embedded applications. With integrated VGA, dual Gigabit Ethernet, and onboard audio, this card provides essential connectivity and multimedia support for a wide range of backplane-based systems.

Technical Specifications

Processor Socket	LGA775
Processor Support	Intel Core™ 2 Duo
Form Factor	PICMG1.0

Connectivity

Ethernet Ports	2 GbE
Video Output	VGA
Audio Support	Yes

Compliance

Certifications	FCC
Hardware Revision	REV:A1.0
