Product Overview

Professional Pillow Block Mounted Bearings

These high-quality pillow block mounted bearings are designed to provide robust load support for rotating shafts where the mounting surface is parallel to the shaft axis. Featuring a re-lubrication facility and compatible with either oil or grease, these units ensure reliable operation in demanding industrial environments. Available in various configurations including UCP, UKP, UCF, and UCC, they offer easy mounting and dismantling for pre-assembled shafts.

Technical Specifications

Lubrication Compatibility

Oil • Grease

Housing Material Options

Cast Iron, Cast Steel, Spheroidal Graphite Cast Iron

Compatible Bearing Types

Spherical Roller Bearing, Self-aligning Ball Bearing

Dimensional Data

Standard Bearing Unit Dimensions

Model	d (mm)	D (mm)	Weight (kg)
UC201	12	47	0.21
UC202	15	47	0.19
UC203	17	47	0.18
UC204	20	47	0.16
UC205	25	52	0.19
UC206	30	62	0.31
UC207	35	72	0.46
UC208	40	80	0.63
UC209	45	85	0.68
UC210	50	90	0.78
UC211	55	100	1.07
UC212	60	110	1.52
UC213	65	120	1.8

Key Features

Available Series

- UCP
- UKP
- UCF
- UCC

Installation

Easy mounting and dismounting of pre-assembled shafts
