Overview

Versatile Pillow Packing Solution

This full-automatic multifunctional pillow packing machine is engineered for stable, high-speed performance across diverse industries including food, pharmaceuticals, and daily chemicals. Featuring an advanced Panasonic PLC programmable control system and a user-friendly touch screen interface, it ensures precise operation and consistent packaging quality. The system includes automatic photoelectric tracking and bidirectional compensation to maintain accuracy, while its stepless speed control allows for adaptable production rates to meet varying operational needs.

Performance Metrics

Production Speed

150 pcs/min
Max Speed

Max Production Height

65 mm

Technical Specifications

Formed Bag Dimensions

Dimension	Range
Bag Length	80-350 mm
Bag Width	60-160 mm

Film Width

445 mm

Control Systems

Key Control Features

- Panasonic PLC programmable control system
- Touch screen operator interface
- Color photoelectric automatic tracking
- Bidirectional compensation mechanism
- Panasonic inverter stepless speed control

Industry Applications

Suitable Industries

Food, Pharmaceutical, Daily Chemical, Hardware
