

Pineapple Peeling and Coring Machine

This machine peels the outside of pineapples and removes the core. It utilizes a cylindrical cutting mechanism with adjustable blades and pneumatic cylinders for consistent results.

Product Overview

Automated Pineapple Processing

The Pineapple Peeling and Coring Machine is a specialized industrial solution designed to streamline fruit processing. This automated system simultaneously removes the outer peel and the central core of pineapples, significantly increasing production efficiency. Built for commercial food processing environments, it ensures consistent results and hygienic operation.

Performance Metrics

Capacity

6 pcs/min
Min Capacity

12 pcs/min
Max Capacity

Motor Power 0.75 kw

Motor Rotary Speed 1400 rpm

Technical Specifications

Dimensions (L x W x H) 1200 x 700 x 1300 mm

Weight 250 kg

Air Compressor Customer must provide

Processing Capabilities

Compatible Pineapple Dimensions

Specification	Range
Outer Diameter	100-110 mm
Core Diameter	70 mm / 80 mm
Pineapple Diameter for 80mm Core	100-130 mm
