

Pink Fused Aluminum Oxide Grinding Wheels

Pink fused aluminum oxide grinding wheels are designed for grinding, deburring, and finishing applications. They offer excellent cutting performance, heat resistance, and long life, making them suitable for use on ferrous and non-ferrous metals.

Product Overview

High-Performance Abrasive Solutions

Pink fused aluminum oxide grinding wheels are engineered for demanding grinding, deburring, and finishing applications. Constructed from premium abrasive grains and durable resin or vitrified bonds, these wheels deliver exceptional cutting performance and superior heat resistance. They are versatile enough for both ferrous and non-ferrous metals, making them an ideal choice for precision grinding, tool sharpening, and surface preparation tasks.

Technical Specifications

Abrasive Material	Pink Fused Aluminum Oxide
Bonding Agents	Resin Bond, Vitrified Bond

Performance Metrics

Key Benefits

- Excellent cutting performance
- High heat resistance
- Extended service life

Application Suitability

Supported Materials

Ferrous Metals • Non-Ferrous Metals

Primary Applications

- Precision Grinding
- Tool Sharpening
- Surface Preparation
- Deburring
- Finishing
