

# Pipe Bender with Integrated Vice

This durable pipe bender is designed for creating precise bends in various pipe sizes. The integrated pipe vice securely holds the pipe in place during bending, ensuring accurate and consistent results.

## ADDITIONAL IMAGES

## Product Overview

### Professional Grade Pipe Bender

This durable pipe bender features an integrated vice, making it a versatile tool for plumbing, electrical, and HVAC applications. Constructed from high-quality ductile cast iron with 45# steel jaws, it offers the strength and stability required for precise bending operations. Designed for efficiency, this tool provides the necessary leverage and control to achieve accurate angles across various pipe sizes.

## Construction & Materials

Body Material	Ductile Cast Iron
Jaw Material	45# Steel

## Performance Features

### Compatible Materials

Steel • Copper • Aluminum

### Standard Bending Angles

- 30
- 45
- 60

### Bending Capabilities

Multi-size Bending, Integrated Pipe Vice
