

Pipe Clamp with Rubber Lining

This pipe clamp ensures secure pipe installation. It features a galvanized steel build for corrosion resistance and a rubber lining to reduce vibration and noise.

Product Overview

Professional Pipe Clamping Solution

This robust pipe clamp is engineered for secure and reliable pipe installation in diverse plumbing, heating, and ventilation systems. Constructed from high-quality galvanized steel, it ensures excellent corrosion resistance for long-term durability. The integrated rubber lining is specifically designed to dampen vibrations and reduce operational noise, while simultaneously protecting the pipe surface from damage and ensuring a tight, reliable grip.

Technical Specifications

Material & Finish	Galvanized Steel
Size Range	75-80 mm (2 1/2 inch)

Key Features

Product Benefits	Vibration Dampening, Noise Reduction, Corrosion Resistant, Surface Protection
------------------	---

Application

Suitable Applications

- Plumbing Systems
- Heating Installations
- Ventilation Systems
