

## Pipe Clamp with Rubber Lining

This pipe clamp is designed with a rubber lining for vibration damping and noise reduction. It features a galvanized steel band and a threaded rod for secure fastening in various pipe applications.

### Product Overview

#### Professional Vibration-Damping Solutions

The Pipe Clamp with Rubber Lining is engineered for secure and stable pipe installation in industrial and commercial environments. Featuring a high-quality galvanized steel band, this clamp provides robust structural support while the integrated rubber lining effectively minimizes vibration and reduces noise transmission. It includes a threaded rod for reliable fastening, making it an ideal choice for applications requiring cushioned, long-lasting pipe support.

### Technical Specifications

#### Application Suitability

- Cushioned pipe support
- Vibration-sensitive installations
- Noise-critical environments
- General industrial piping

Construction Material	Galvanized Steel
Key Features	Rubber Lining, Vibration Damping, Noise Reduction, Galvanized Finish
Fastening Type	Threaded Rod
