

Pipe Fittings

Pipe fittings designed for plumbing and drainage systems. They provide durable and reliable connections for fluid transport.

Product Overview

Professional Grade Pipe Fittings

These high-quality pipe fittings are engineered for robust plumbing and drainage applications. Constructed from a combination of durable cast iron and stainless steel, they ensure reliable, leak-proof connections for various fluid transport systems. Designed for versatility, this collection includes essential components such as elbows, tees, and couplings to accommodate diverse piping configurations.

Material Composition

Materials	Cast Iron, Stainless Steel
-----------	----------------------------

Application Details

Available Components

- Elbows
- Tees
- Couplings
- Specialized Connectors

Primary Applications

Plumbing Systems • Drainage Systems • Fluid Transport
