Product Overview

Professional Pipe Threading Solution

This robust threading machine is engineered for high-efficiency pipe processing in plumbing and industrial environments. It features a high-precision self-oiling system that extends the longevity of the dies and ensures consistently smooth operation. Designed for heavy-duty use, the unit includes an integrated reamer and a quick-change die head system for maximum workflow productivity.

Performance Specifications

Threading Capacity	2 inch
Minimum Pipe Size	0.5 inch

Feature Highlights

Die Head Settings

- Size Indicator 1
- Size Indicator 2
- Size Indicator 3
- Size Indicator 4
- Auto-type mode

Capabilities

Self-oiling system, Quick-change die head, Integrated reamer, Auto-type threading
