

Pipe Threading Machine

This pipe threading machine is designed for threading pipes of various sizes. It features a self-oiling system for extended die life and precise threading.

Product Overview

Professional Pipe Threading Solution

This robust pipe threading machine is engineered for high-performance threading in plumbing, construction, and industrial environments. It features a self-oiling system to maximize tool longevity and a heavy-duty motor designed for consistent, precise results. The equipment is equipped with a secure chuck for clamping and a smooth carriage system to ensure efficient pipe advancement during operation.

Technical Specifications

Applications

- Plumbing
- Construction
- Industrial piping

Threading Capacity

1/2" to 3"

Included Components

Die Head, Die, Self-oiling system, Chuck, Carriage, Oil reservoir
