

Pipeline Y-Strainer

This Y-strainer is designed for installation in pipelines to protect equipment. It is used to filter solids from fluids, ensuring a clean flow.

Product Overview

Pipeline Y-Strainer Protection

This Y-strainer is engineered for seamless installation in pipelines to safeguard critical process equipment, including pumps, meters, control valves, steam traps, and regulators. By efficiently filtering solids from fluids, it ensures a clean, uninterrupted flow throughout your system. Designed for durability and ease of maintenance, it features accessible screens and robust construction suitable for water, oil, and gas applications.

Technical Specifications

Model Identifier	S3-C25
Nominal Diameter	DN25
Pressure Rating	16 bar

Design Features

Connection Type	Flanged
Maintenance	Easily removable screen for cleaning or replacement

Applications

Protected Equipment	<ul style="list-style-type: none">• Pumps• Meters• Control Valves• Steam Traps• Regulators
Compatible Media	Water, Oil, Gas
