

PIR Motion Activated Bird Repeller

This PIR bird repeller uses a passive infrared sensor to detect movement. Upon activation, it emits ultrasonic sound waves and flashing LED lights to effectively repel birds from the area.

Product Overview

Effective Pest Deterrence

The HCX-K705 PIR Bird Repeller is an advanced solution designed to deter unwanted animals, bats, and birds from specific outdoor areas. Utilizing Passive Infrared (PIR) technology, it detects movement within a wide range and triggers a response to keep your premises clear. This weather-resistant device is ideal for maintaining property hygiene and protecting crops or structures.

Technical Specifications

Power Consumption

3.5 mAh
Standby

350 mAh
Working

Power Source

4 x AA dry batteries (not included)

Performance

PIR Detection Range

10 m

Detection Angle

90 - 120°

Coverage Area

200 sq. m

Operational Features

Available Modes

OFF • DAY • NIGHT

Key Features

- Motion-activated PIR sensor
- Ultrasonic sound wave emission
- Flashing LED deterrents
- Weather-resistant design
- Adjustable sensitivity and frequency
