

Piston Air Compressor with 8-Gallon Tank

This piston air compressor is designed for industrial and commercial applications. It features an 8-gallon tank for ample air storage and reliable performance.

Overview

Robust Industrial Performance

The ZBW60B-8G is a reliable piston compressor engineered for consistent performance in both industrial and commercial environments. Featuring an 8-gallon tank, it provides essential air storage capacity for continuous operation during tasks like powering pneumatic tools, spray painting, or inflation. Its compact design ensures versatility for both stationary and mobile applications.

Technical Specifications

Tank Capacity	8 Gallon
Motor Power	1.5 HP
Voltage	120 V
Frequency	60 Hz
Rated Current	10 A

Key Features

Performance Highlights

1.5 HP Power Output	8 Gallon Tank Size
-------------------------------	------------------------------

Safety & Protection	Pressure Relief Valve, Thermal Overload Protection
---------------------	--

Maintenance

Maintenance Guidelines

- Regularly drain the tank to remove moisture
- Inspect and clean air filters periodically
- Check for consistent pressure output
