

Planetary Gear Unit

This planetary gear unit offers high reliability and handles high loads. Its modular design ensures equal intensity and reduces noise.

Overview

High-Performance Planetary Gear Unit

This planetary gear unit is engineered for demanding industrial applications requiring reliable power transmission. Designed with a robust construction, it offers high torque density and efficient speed reduction. Its versatile performance characteristics make it suitable for a wide range of heavy-duty machinery and equipment.

Performance Metrics

Max Output Torque

2600000 N.m
Output Torque

Input Power Range

0.4 - 12934 kW

Technical Specifications

Gear Ratio Range

25 - 4000

Model Range

9 - 36
