

Plant Protection Sprayer

This plant protection sprayer is designed for the effective application of pesticides, herbicides, and fertilizers. It features adjustable settings for customized application rates, ensuring uniform distribution and minimizing waste.

Overview

Robust Plant Protection Machinery

The X-CG410 is a high-performance plant protection sprayer engineered for the efficient application of pesticides, herbicides, and fertilizers in demanding agricultural settings. Its durable construction ensures long-term reliability, while the precision nozzle system guarantees uniform distribution to minimize waste and maximize crop coverage. Designed for versatility and ease of maintenance, this machinery features adjustable settings to accommodate various crop types and specific treatment requirements, ultimately boosting productivity and reducing operational costs.

Technical Specifications

Model Number	X-CG410
Suitable Applications	Pesticides, Herbicides, Fertilizers

Key Features

Performance Highlights

1 Level Uniform Distribution	100 % Coverage Efficiency
--	-------------------------------------

Operational Benefits

- Durable construction for longevity
- Precision nozzle system
- Adjustable application rates
- Low maintenance requirements
