

# Plasma Cutting Machine

This plasma cutting machine is designed for efficient and precise metal cutting. It features an IGBT inverter for stable and reliable performance and a digital display for easy monitoring.

## Product Overview

### Professional Plasma Cutting Solution

The LGK 100 IGBT Inverter is a robust plasma cutting machine engineered for high-efficiency and precise metal fabrication. Utilizing advanced IGBT inverter technology, it ensures stable, reliable performance across demanding industrial tasks. The unit features an intuitive digital display and precise control knobs, allowing operators to easily monitor and adjust cutting parameters for optimal results.

## Technical Specifications

|                   |               |
|-------------------|---------------|
| Technology Type   | IGBT Inverter |
| Model Designation | LGK 100       |

## Key Features

### Control Features

- Digital display for parameter monitoring
- Precision current adjustment knob
- Integrated circuit breaker for safety

|                |   |
|----------------|---|
| Design & Build | Durable Casing, Ventilation Cooling, Portable Handles |
|----------------|---|
