

Plastic Air-Pressure Ventilating Fan

This plastic air-pressure ventilating fan is designed for efficient air circulation. Its durable plastic construction makes it lightweight and corrosion-resistant, suitable for various environments.

Overview

Efficient Air Circulation Solution

This deluxe full plastic air-pressure ventilating fan is engineered for reliable air circulation in homes, offices, and enclosed spaces. Its durable, lightweight plastic construction offers excellent corrosion resistance, ensuring longevity in various environments. Designed with high-performance motors and aerodynamic blades, it provides optimal airflow displacement while maintaining minimal noise levels for a comfortable indoor environment.

Performance Metrics

Key Performance Indicators

0 Minimal

Noise Level

Design & Construction

Body Material	High-quality durable plastic
Blade Type	Aerodynamically designed for maximum displacement
Construction Features	Lightweight, Corrosion-Resistant, Full Plastic Housing

Safety & Operation

Safety Components

- Integrated protective grill
- Accidental contact prevention
- High-performance motor

Applications

Recommended Usage

Residential Homes • Commercial Offices • Enclosed Indoor Spaces

Technical Specifications

Operation Method	Air-Pressure Ventilating
