

Plastic Basket Injection Mold

Injection molds designed for the production of plastic baskets. These precision-engineered molds ensure high-quality output and efficient manufacturing.

Overview

Precision Injection Molding Solutions

These high-precision injection molds are specifically engineered for the efficient, high-volume production of plastic baskets. Designed for durability and consistent output, they ensure reliable manufacturing performance across various basket configurations. This tooling solution is suitable for industrial plastic processing environments requiring high-quality, repeatable results.

Technical Details

Available Mold Series

- Basket Mould_382
- Basket Mould_381
- Basket Mould_380
- Basket Mould_379
- Basket Mould_378
- Basket Mould_377

Application

Plastic Injection Molding • Basket Manufacturing
