

Plastic Basket Mold

This mold is designed for manufacturing plastic baskets through injection molding. It is constructed from durable metal to ensure consistent production of basket halves.

Product Overview

High-Efficiency Plastic Basket Molding Solution

This industrial-grade mold is engineered for the high-volume production of plastic baskets, suitable for various household applications including laundry, storage, and dish drying. Designed for precision and durability, the mold allows for the simultaneous creation of two identical basket halves, significantly optimizing manufacturing throughput. It supports versatile design outputs, enabling manufacturers to produce consistent, high-quality plastic goods efficiently.

Technical Specifications

Compatible Model Series

- Basket Mould_376
- basket mould_469
- basket mould_468
- basket mould_467
- basket mould_466
- basket mould_465

Capacity per Cycle	2 units
Construction Material	Durable Industrial Metal

Applications

Product Applications	Laundry Baskets, Storage Solutions, Dish Drying, Household Goods
