

# Plastic Basket Mould Set

This set of plastic basket moulds is designed for manufacturing various sizes and styles of plastic baskets. These moulds are engineered for efficient production and consistent quality, ensuring precise dimensions and durable construction of the final plastic products.

## Product Overview

### High-Efficiency Basket Mould Set

This comprehensive set of plastic basket moulds is engineered for the high-volume production of diverse household and industrial storage solutions. Designed specifically for injection moulding processes, the system ensures precise dimensional accuracy and consistent, durable construction across every unit produced. From laundry baskets and dish racks to shopping and storage containers, this versatile tooling set allows manufacturers to maintain high output standards for a wide variety of basket styles.

## Technical Specifications

### Included Mould Designs

- Laundry Baskets
- Dish Racks
- Picnic Baskets
- Shopping Baskets
- Storage Containers

### Manufacturing Process

Injection Moulding

### Model Identifiers

464, 463, 462, 385, 384, 383
