

Plastic Blow Molding Machine

This plastic blow molding machine is designed for efficient production of plastic containers. It features a robust frame, advanced hydraulic system, and user-friendly controls.

Overview

High-Performance Blow Molding Solution

This high-performance plastic blow molding machine is engineered for the efficient, high-volume production of plastic containers. Featuring a robust frame and an advanced hydraulic system, it ensures reliable operation for manufacturing bottles, jerrycans, and various hollow plastic products. The system includes a high-capacity hopper and precision molding capabilities that promote consistent output while minimizing material waste.

Technical Specifications

Model Number	CSD-EB65J2-A2-2
Suitable Applications	Bottles, Jerrycans, Hollow Plastic Products, CSD Containers

Key Features

Machine Highlights

- Robust structural frame
- Advanced hydraulic system
- High-capacity material hopper
- Precision molding capabilities
- Modular design for easy maintenance

Operational Benefits

Consistent Output • Minimal Waste • Customizable • User-Friendly Controls
