

Plastic Bottle Blow Mold

This blow mold is designed for manufacturing plastic bottles. It features high-quality metal construction and robust alignment mechanisms for consistent production.

Product Overview

Precision-Engineered Blow Mold

This precision-engineered blow mold is specifically designed for the manufacturing of high-quality plastic bottles. Built with robust metal construction and detailed cavity design, it ensures intricate bottle shapes and consistent production results. It is an ideal solution for high-volume manufacturing environments, prioritizing dimensional accuracy and long-term durability.

Technical Specifications

Production Suitability

High-volume • Industrial

Construction Material

High-quality metal

Key Features

Key Features

- Precision cavity design for intricate shapes
- Robust alignment mechanisms
- High dimensional accuracy
- Durable construction for long service life
