

Plastic Button Head Rivets Assortment

These black plastic rivets are designed for a variety of fastening applications. The assortment includes different lengths and diameters, making them suitable for joining various material thicknesses.

Product Overview

Versatile Fastening Solution

This assortment of black plastic button head rivets is engineered for a wide range of fastening applications across automotive, electronics, and general assembly industries. Designed to provide a secure and permanent connection, these rivets eliminate the need for traditional threading or welding processes. Their non-corrosive and vibration-resistant properties make them an ideal choice for joining materials like plastic, fabric, and sheet metal.

Key Features

Compatible Materials

- Plastic
- Fabric
- Sheet Metal

Fastener Style	Button Head
Properties	Non-corrosive, Vibration-resistant

Applications

Primary Industries

Automotive • Electronics • General Assembly
